Peace is Possible

I AM PEACE!

The world is likened to a conglomerate. Our human diversities present numerous possibilities for misunderstandings and conflicts, in forms imaginable and unimaginable.

Some persons think that peace is elusive. When one considers the level of conflicts within oneself, family, work place, community, country and the world, achieving peace can be dismal.

If we reflect on the effect that small waves make on the surface of water - the ripple effect, we will realize that being an agent of peace can positively effect peace on our families. Our family members then propagate peace and peace spreads.

Let Your Peace Agenda be Known

What are your intentions for peace? What are your actions for peace?

What is your Peace Agenda?

Let each individual identify solutions to the numerous problems that plague society, by noting "**What I can do.**"

We will be amazed at the successes that will result from our resolutions.

The Peace Agenda prompts everyone to do something for peace. Here is my Peace Agenda:

"I will be a voice of peace, I will be an action of peace."

"Together, we can foster a more peaceful, non-violent world." —

Ukpeme Akpan Okon

Agenda of everyone
across the world is
ongoing. Kindly send your
